EDUCATION

University of California, Berkeley — *B.A. Molecular Biology | B.S. Data Science*

Aug 2024 – May 2028

GPA: 3.82 / 4.00 | **Relevant Coursework:** CS61B (Data Structures & Algorithms), Data C88C (Computational Structures in Data Science)

EXPERIENCE

Research Affiliate — *Lawrence Berkeley National Laboratory*

Jan 2026 – Present

- Built Python data pipelines to transform microbial trait data from KG-Microbe, GTDB, NCBI, and study outputs into standardized wide and long TSV tables for downstream search and comparative analysis.
- Implemented aggregation, normalization, and validation logic for heterogeneous bioinformatics datasets, including feature summarization, cross-database table merging, row/trait reshaping, and automated tests to ensure analysis-ready outputs.

Finance Director — *ASUC Berkeley, South Asian Ad Hoc Office*

Aug 2025 – Present

- Direct an annual budget for a university-mandated student government body, overseeing fund allocation, internal expense tracking, and large-scale vendor payments.
- Oversee contingency funding and Wellness Fee submissions, maintaining strict compliance across 89+ tracked deadlines and university financial governance requirements.

Finance Director — *South Indian Society, UC Berkeley*

Sept 2024 – Present

- Manage end-to-end budgeting and reimbursements for a 100+ member organization; redesigned financial tracking systems, reduced reimbursement processing latency.
- Standardized financial record-keeping with automated audit trails, improving transparency and enabling data-driven spending forecasts for upcoming fiscal cycles.

PROJECTS

Canvascope — canvascope.org

Founder / CEO

- Founded a privacy-first Chrome extension platform for Canvas and Brightspace LMS indexing and semantic search, scaling to 10+ university domains with local-first processing and sub-100ms fuzzy matching.
- Built an integrated ecosystem with automated document categorization and LLM embeddings for intelligent retrieval, serving as the central hub for Lectra (See Above) and other productivity sub-products (Like MedMatch).
- Manage product strategy: authored roadmap documentation, defined role structures, and overseen Vercel deployments for a unified, cross-platform student productivity suite.

Lectra — canvascope.org

Swift, SwiftUI, iOS Development

- Developed a native iOS application for Apple Pencil annotation, featuring a custom **DropBridge v2** file transfer protocol for seamless document sharing with the **Canvascope** ecosystem.
- Implemented real-time backend synchronization using Supabase, enabling cross-platform access to annotated PDFs and intelligent categorization of handwritten notes.
- Optimized PDF rendering and stroke capture for low-latency feedback on iPad Pro displays, providing a paper-like experience for clinical and academic note-taking.

MedSphere — medsphere.cubechef.com

Next.js, Javascript, Supabase

- Built a full-stack health platform featuring a live FDA drug label lookup API and real-time Supabase chat for patient-provider communication simulations.
- Developed a multi-source healthcare jobs aggregator leveraging Greenhouse, Lever, and RSS APIs; implemented server-side filtering for rapid, domain-specific search results.
- Worked with industry professionals to design and program a website tailored to what healthcare professionals need.

MedMatch (MSAR Prerequisite Engine) — medmatch.canvascope.org

Next.js, Supabase, Javascript

- Engineered a sophisticated matching engine that evaluates medical school eligibility across 159 institutions by comparing user coursework against 1,162 AAMC requirements.
- Built a custom PDF ETL pipeline to ingest and normalize the 2026 MSAR dataset; implemented credit-hour conversion logic and school-specific policy evaluation (e.g., AP/IB credit pooling).
- Integrated with Canvascope environment (See Below) to pull courses from current Canvas courses student is enrolled in.

TECHNICAL SKILLS & CERTIFICATIONS

Languages & Tools: Python, Java, SQL, JavaScript, HTML/CSS, Git, Swift/SwiftUI, Docker, Linux, Raspberry Pi

Data & ML: Pandas, NumPy, Jupyter, Semantic Search, Embeddings (MPNet), PDF ETL, Algorithm Design

Certifications: American Heart Association BLS (Basic Life Support)
