EDUCATION

University of California, Berkeley — *B.A. Molecular Biology | B.A. Data Science*

Aug 2024 – May 2028

GPA: 3.82 / 4.00

EXPERIENCE

Finance Director — *ASUC Berkeley, South Asian Ad Hoc Office*

Aug 2025 – Present

- Directed annual budget of **\$10K+** for a university-recognized student government body, overseeing fund allocation, expense tracking, and vendor payments.
- Led contingency funding, reimbursement workflows, and Wellness Fee submissions with ASUC offices, maintaining compliance across **89+** tracked funding questions and deadlines.
- Authored a multi-phase MHISA funding proposal with timeline, evaluation metrics, and sustainability plan; coordinated with CAPS and executive stakeholders on implementation.

Finance Director — *South Indian Society, UC Berkeley*

Sept 2024 – Present

- Managed end-to-end budgeting, reimbursements, and vendor negotiations for a **100+ member** cultural organization.
- Redesigned financial tracking systems with standardized spreadsheets and approval workflows, reducing reimbursement processing time by **40%**.
- Owned event budget execution for cultural programming (including Dosas & Mimosas and menstrual equity initiatives), improving spending visibility and accountability.

PROJECTS

Canvascope Ecosystem (Canvascope, NoteVault, SwipeWipe, Lectra)

[canvascope.org](#)

Founder / CEO / Lead Developer

- Founded and built a privacy-first Chrome extension platform for Canvas LMS indexing/search with fuzzy matching, semantic retrieval (LLM embeddings), and local-first processing.
- Expanding into a unified ecosystem with an in-development iOS application for rapid thought capture, utilizing automated categorization and real-time backend synchronization with the Chrome extension.
- Managed Vercel deployments, GitHub release/version workflows, and Chrome Web Store compliance while scaling to **10+ university domains**.
- Led startup strategy across product and operations: authored mission/roadmap documentation, defined role structure (CPO/CFO/CMO), and drafted equity/vesting governance plans.

KG-Microbe Bioinformatics Pipelines

Research Apprentice / Independent Researcher

- Processed large-scale microbial datasets (GTDB, NCBI, TSV, JSONL) to reshape trait profiles, generate analysis-ready tables, and standardize metadata.
- Built reproducible scripts for taxonomy mapping, data validation, and trait-inference pipelines; diagnosed data corruption and format inconsistencies.
- Used Git LFS and branch-based workflows for large-file versioning, repository migration, and collaborative research reproducibility.

Homelab Infrastructure & Finance Knowledge Automation

Systems Engineer / Builder

- Built a Raspberry Pi 5 NAS on OpenMediaVault with Docker services, backup planning, SSH administration, and network-level troubleshooting across DNS/DHCP/router integration.
- Deployed privacy and remote-access tooling (Pi-hole, Tailscale) and resolved DNS conflicts through log-driven debugging and safe service rollback procedures.
- Created a personal finance knowledge agent with structured markdown directories, query storage, and Codex-assisted automation for institutional documentation workflows.

TECHNICAL SKILLS

Languages & Tools: Python, Java, SQL, JavaScript, HTML/CSS, Git/GitHub

Data & ML: Data Analysis, Pandas, NumPy, Jupyter, Semantic Search, Embeddings (MPNet), ONNX Runtime Web

Infrastructure: Docker, Linux, OpenMediaVault, Raspberry Pi, DNS/DHCP, SSH, Tailscale, Vercel, Supabase

Productivity: Microsoft Excel (Pivot Tables, VBA, Advanced Functions), Google Workspace
